
Arrowhead County Geospatial Collaborative Meeting

Friday, April 13, 2018 | 10:00am – 12:30pm

ARDC | 221 West 1st Street | Duluth, MN 55802 | join.me/arrowheadrdc

Goals of the meeting: Review work to date, review BLM control point table in relation to the pilot project, assess pilot project timelines and who will do the work, address what is needed in order to update the public ownership layer.

AGENDA

1. Review of BLM Control Table

- Control point data field comparisons between counties (Charlie Moore)
- What items should be added or removed from the BLM table?

2. Review SharePoint (Dan Ross)

3. Overview of pilot project (Charlie Moore/Dan Ross)

- Who – St. Louis, Lake, & Cook Counties
- Where – Township 59 within the Superior National Forest Boundary
- What – Standardized multi-jurisdictional control point data. About 2000 corners with metadata that defines proper accuracy values and how determined.
 - i. Identify best practices – What are each county's capabilities for populating control point table?
 - ii. Identify available control data – DNR, DOT, County, Etc.
- Identify project workflow/number of hours for funding estimates, timeline
- How might this be adapted for the entire Region?

4. Building a Generalized Public Land Ownership Layer (Tom McCann/Eric Gdula)

- Can we build/update another layer?
- Can the layer be attributed to facilitate query and analysis?
- How can we include sub-types for the generalized owners?
- Assessing misidentified acres (SLC)

5. Next Steps

- Make changes to pilot project outline based on feedback from this meeting
- Develop estimated budgets/timelines for pilot project, and ownership update
